

Environmental Policy

Gartner Rose is committed to delivering projects which contribute to increased social and economic outcomes, through operating in an environmentally responsible and sustainable manner.

Gartner Rose strives to implement its environmental policy and objectives through our commitment:

- to identify and comply with legal and applicable requirements
- to protect biodiversity and ecosystems
- to promote climate change mitigation and adaptation
- to utilise sustainable resources
- to reduce waste on our projects

Gartner Rose promotes environmentally safe working conditions for its employees and subcontractors focussing on the awareness of environmental issues and protection measures through on-going communication and training.

Gartner Rose evidences its commitment to achieving the purpose of this policy through setting and measuring key objectives and goals as articulated in the WHS, Quality and Environment Strategic Plan.

Gartner Rose shall achieve success under this policy by, as far a practical:

- Ensuring the allocation of adequate company resources to environment management
- Ensuring all its employees and contractors comply with all relevant environmental laws, regulations, standards and company procedures
- Proactively identifying and managing any environmental risks within its operations
- Working with suppliers, clients and the community to reduce net waste production
- Minimising impact on the environment as a result of the services we provide or the products we use
- Where possible, recycling materials and/or using recycled or sustainable materials; and
- Constantly engaging in continual improvement initiatives.

It is a condition of entry to sites that Gartner Rose Environmental Policy and associated plans and procedures are complied with. This includes workers, consultants, visitors and contractors. Anyone who enters our sites has a duty to comply with reasonable directives from Gartner Rose, take every reasonable step to achieve the objectives of this policy and relevant plans, and report non-conformances as identified.
