

Environmental Policy

Gartner Rose aims to deliver construction projects which contribute to improved social and economic outcomes, through operating in an environmentally responsible and sustainable manner.

Gartner Rose's management team is committed to demonstrating leadership with respect to the Environmental Management System, and taking accountability for the effectiveness of the system.

Senior management will also ensure the integration of the Environmental Management System into the company's business processes, and promote the use of a process approach and risk-based thinking.

We strive for environmental excellence in all our activities, and our objectives are to:

- Achieve zero environmental breaches
- Ensure sustainability through the effective and efficient use of resources
- Prevent pollution, protect the environment, preserve natural resources and conserve flora, fauna and heritage aspects
- Maintain an Environmental Management System to ISO 14001:2015
- Meet all our compliance obligations

To achieve these objectives, we shall act to:

- Ensure high levels of management and staff involvement in achieving our stated objectives
- Continuously engage all stakeholders in meaningful consultation and communication on environmental matters
- Wherever possible, use suppliers and subcontractors who have similar environmental objectives and who give preference to environmentally friendly products, equipment and processes
- Always weigh the environmental benefits of a product or service with cost and safety benefits
- Minimise pollution and environmental impacts from our works by developing work methods that reduce the risk of environmental damage
- Continuously improve our Environmental Management System to enhance environmental performance
- Develop environmental objectives and targets, review performance against these objectives and targets on an annual basis, and communicate results
- Contribute to energy/resource saving by offering eco-conscious products and work methods to our clients where possible
- Reclaim used materials where appropriate and recycle them where possible
- Train our people and subcontractors on environmental awareness
- Measure our performance and use this information for the continual improvement of our services and Environmental Management System

This Policy is applicable throughout Gartner Rose, and to contractors and suppliers in the conduct of their activities for and on our behalf. It will be reviewed on an annual basis, together with the measurable objectives and targets, to ensure that it remains relevant and suitable to operations.
